# ACHD Travel Directory

TWELFTH EDITION

International Society for  
Adult Congenital Heart Disease  
[www.isachd.org](http://www.isachd.org)

**Adult  
Congenital  
Heart   
Association**

This publication is intended to help you find emergency congenital heart care when traveling. It lists the clinic name, city, state and phone number, as well as the name of directors of all the United States ACHD programs that confirmed contact information as of 2018. It also lists contact information for international (including Canadian) ACHD programs.

If you are choosing an ACHD care team, please consult the online ACHD Program Directory available at [www.achaheart.org](http://www.achaheart.org). This directory offers extensive information on size, staffing, and services available at each program. **Inclusion in the directory does not mean that ACHA recommends or endorses an ACHD program.**

We urge all those seeking ACHD specialty care to ask your own questions about what kind of special training, services, and staffing are offered at any ACHD program you are considering. For more information and resources to help you choose ACHD care, visit [www.achaheart.org](http://www.achaheart.org).

# Planning Ahead

FOR HEALTH EMERGENCIES

## **Before You Go:**

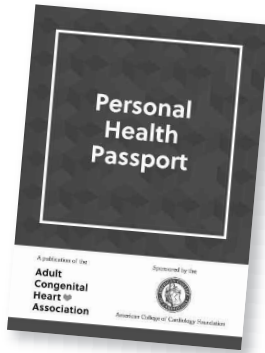

- Ask your ACHD program:
  - What symptoms to consider an emergency;
  - What number to call to access 24-hour ACHD coverage;
  - If you have special emergency risks or requirements.
- Carry a 24-hour access number for your ACHD program at all times;
- Tell family/companions to call your ACHD program in an emergency;
- Carry key health records with you when you travel;
- If you have active health issues, review travel plans with your ACHD team;
- If you will be in a remote location, ask about travel evacuation insurance.

## On the Road:

- If there is time, call your ACHD program first. Ask them to contact the local ACHD program and ER for you;
- Tell the ER staff your diagnosis, health history, and important health problems;
- Make sure the ER staff contacts your ACHD program. To help this happen, you/your companion may need to initiate the call.

ACHA recommends the use of ACHA's Personal Health Passport. It lists a 24-hour access number for your ACHD program, diagnosis, and key health problems.

You can request/print a Personal Health Passport at [www.achaheart.org](http://www.achaheart.org).
