Webinars Presents:

Helping Your Children Cope with Your Congenital Heart Disease

Wednesday, August 28, 2019, 7 p.m. – 8 p.m. EDT

Presenter: Jamie Jackson, PhD

About the Webinar
Have you ever thought about how to talk to your children about your congenital heart disease (CHD)? Do you know about important considerations and common concerns that might arise when you talk to them? Do you wonder and even worry about how they will process the information? Do you want to feel more prepared to discuss your health with your children? If so, you should attend this webinar. It will help you feel more prepared to have conversations about your health with your children. Additionally, you will gain a better understanding of how children process information about health. Register today to learn more about talking with your children about CHD from licensed clinical psychologist Dr. Jamie Jackson.

About the Presenter
Dr. Jamie Jackson is an Assistant Professor of Pediatrics and Psychology at Nationwide Children’s Hospital and The Ohio State University. She is also a licensed clinical psychologist who collaborates with the Columbus Ohio Adult Congenital Heart (COACH) Program. Dr. Jackson has multiple research interests, including identifying factors that help adolescents and young adults with CHD better care for themselves independently. She is a member of ACHA’s Medical Advisory Board.

About the Adult Congenital Heart Association
The Adult Congenital Heart Association (ACHA) is a national not-for-profit organization dedicated to improving the quality of life and extending the lives of adults with congenital heart disease (CHD). ACHA serves and supports the more than one million adults with CHD, their families and the medical community—working with them to address the unmet needs of the long-term survivors of congenital heart defects through education, outreach, advocacy, and research. For more information about ACHA, contact (888) 921-ACHA or visit www.achaheart.org.

Sponsorship support provided by Actelion Pharmaceuticals US, Inc., and Gilead Sciences.
