Webinars Presents:

**Catheter-Based Options for Valve Problems for ACHD Patients**

**Thursday, May 7, 2020, 7 p.m. – 8 p.m. EDT**

Presenter: C. Huie Lin, MD, PhD

**About the Webinar**

Improvements in cardiac catheterization allow great advances in the care of patients with congenital heart disease. Did you know that recently developed procedures make it possible to treat valvular heart disease without open heart surgery? Dr. C. Huie Lin will talk about what’s currently being done. He will also tell us what is on the horizon. This webinar is not to be missed! Register today.

**About the Presenter**

Dr. C. Huie Lin was born and raised in Tempe, AZ. His education and training have taken him to New Haven, CT, Charlottesville, VA, and Boston. Caring for adults with congenital heart disease captured his heart and mind during cardiology training at Washington University in St. Louis. He went on to receive additional training at St. Louis Children’s Hospital and Barnes Jewish Hospital where he specialized not only in adult congenital heart disease, but also in transcatheter interventions in congenital heart disease. After moving to Houston, he started the Houston Methodist Adult Congenital Heart Program, which now continues to grow in its sixth year. Dr. Lin is a member of the ACHA Medical Advisory Board.

**About the Adult Congenital Heart Association**

The Adult Congenital Heart Association (ACHA) is a national not-for-profit organization dedicated to improving the quality of life and extending the lives of adults with congenital heart disease (CHD). ACHA serves and supports the more than one million adults with CHD, their families and the medical community—working with them to address the unmet needs of the long-term survivors of congenital heart defects through education, outreach, advocacy, and promotion of ACHD research. For more information about ACHA, contact (888) 921-ACHA or visit [www.achaheart.org](http://www.achaheart.org).
