Webinars Presents:

**Pulmonary Arterial Hypertension: A Roadmap for ACHD Patients**

**Wednesday, July 22, 2020, 7 p.m. – 8 p.m. EDT**

Presenter: Ian Harris, MD

About the Webinar
Have you been told you have pulmonary vascular disease/pulmonary arterial hypertension (PAH)? Do you know that it can develop due to certain types of congenital heart disease (CHD)? Do you know how that happens? Do you know the different types of treatment? If you want to learn more, you will want to attend this webinar. Dr. Ian Harris, ACHD cardiologist, will review what causes PAH and discuss the types of clinical research going on in the area of therapy for PAH. He will also go over current treatments and a general approach to using these therapies.

About the Presenter
Dr. Ian Harris earned his medical degree from UCSF School of Medicine and completed his residency in internal medicine at Barnes-Jewish Hospital. Dr. Harris returned to UCSF Medical Center to complete his cardiology and adult congenital cardiology fellowships, as well as a research fellowship in developmental biology at the UCSF Cardiovascular Research Institute. Dr. Harris is the Director of the Adult Congenital Cardiology Program at UCSF. He is board certified in ACHD, internal medicine and cardiovascular disease and is also a member of the ACHA Medical Advisory Board.

About the Adult Congenital Heart Association
The Adult Congenital Heart Association (ACHA) is a national not-for-profit organization dedicated to improving the quality of life and extending the lives of adults with congenital heart disease (CHD). ACHA serves and supports the more than one million adults with CHD, their families and the medical community—working with them to address the unmet needs of the long-term survivors of congenital heart defects through education, outreach, advocacy, and promotion of ACHD research. For more information about ACHA, contact (888) 921-ACHA or visit [www.achaheart.org](http://www.achaheart.org).
