

Neurocognitive Deficits in the Adult with Congenital Heart Disease: A Brief Overview

Wednesday, May 25, 2022

7 p.m. – 8 p.m. EDT

Presenter: Ali Zaidi, MD

About the Webinar

Participating in society, forming meaningful relationships, and working together in all types of settings is a basic part of development. Research about the cognitive function of adults with congenital heart disease (CHD) as they get older is important. Do you want to know more about neurocognition and executive functioning? Are you interested in learning what might cause neurocognitive decline in adults with CHD? Do you wonder if there is any way to predict this? Dr. Ali Zaidi will talk about these topics and more in this webinar. You do not want to miss it. Register today.

About the Presenter

Dr. Ali Zaidi is a member of the ACHA Medical Advisory Board. He is a board-certified adult congenital heart disease (ACHD) cardiologist who trained in ACHD, pediatric cardiology, and adult cardiovascular disease at The Ohio State University Nationwide Children's Hospital in Columbus, OH. He also received advanced training in cardiac imaging at The Ohio State University. He is currently Associate Professor of Medicine and Pediatrics, Director of the Adult Congenital Heart Disease (ACHD) Center, Director of Pediatrics to Adult Transition of Care Program, and Director of Academic Affairs, Division of Pediatric Cardiology at Mount Sinai Hospital in New York.

About the Adult Congenital Heart Association

The Adult Congenital Heart Association (ACHA) is a national not-for-profit organization dedicated to **supporting individuals and families living with congenital heart disease and advancing the care and treatment available to our community.** ACHA empowers the more than nearly 2 million adults with CHD, their families, and the medical community by advancing access to resources and specialized care that improve patient-centered outcomes. For more information about ACHA, contact (888) 921-ACHA or visit www.achaheart.org.
