

Life with Eisenmenger Syndrome and PAH

Wednesday, October 12, 2022

7 p.m. – 8 p.m. EDT

Presenter: Anitra Romfh, MD

About the Webinar

Eisenmenger syndrome represents a population of patients who have unrepaired congenital heart disease (CHD). They are unique to other Group 1 Pulmonary Arterial Hypertension (PAH) patients in that Eisenmenger syndrome is a multisystem disorder.

Do you know what cardiac defects lead to Eisenmenger syndrome? What are special considerations in treatment? Do you know the lifetime risks, and how these risks should be managed? How does this treatment for Eisenmenger syndrome impact the quality of life and survival? Register for this webinar to learn the answers to these questions and more!

About the Presenter

Dr. Anitra Romfh is an ACHA Board Certified cardiologist. She joined Stanford in 2013 and is now a clinical associate professor caring for adult survivors with congenital heart disease, managing patients with pulmonary hypertension in the cardiovascular critical care setting. Her training in combined internal medicine and pediatrics and background in chemical engineering and clinical research gives her a unique perspective on the care of these complex patients.

About the Adult Congenital Heart Association

The Adult Congenital Heart Association (ACHA) is a national not-for-profit organization dedicated to **supporting individuals and families living with congenital heart disease and advancing the care and treatment available to our community.** ACHA empowers the more than nearly 2 million adults with CHD, their families, and the medical community by advancing access to resources and specialized care that improve patient-centered outcomes. For more information about ACHA, contact (888) 921-ACHA or visit www.achaheart.org.
