ACHD and Heart Failure

Wednesday, August 16, 2023
7 p.m. – 8 p.m. EDT
Presenter: Ari Cedars, MD

About the Webinar:
Did you know that heart failure is the leading cause of death in adults with congenital heart disease (CHD)? Advances have been made in treating it in adults who do not have CHD, yet little is known about treating it in adults with CHD. Join us to review what we currently know about treatment in CHD adults. You will also learn about the future of therapy and what options are available for adults with CHD and end-stage heart failure.

About the Presenter:
Dr. Ari Cedars is a member of ACHA’s Medical Advisory Board and director of the ACHD program at Johns Hopkins Hospital. He has an interest in patient-centered care and care individualization based on the ways that the molecules and genes in the body change in different types of CHD. He also has an interest in mechanical circulatory support and transplant in adult CHD.

About the Adult Congenital Heart Association
The Adult Congenital Heart Association (ACHA) is a national not-for-profit organization dedicated to supporting individuals and families living with congenital heart disease and advancing the care and treatment available to our community. ACHA empowers the more than nearly 2 million adults with CHD, their families, and the medical community by advancing access to resources and specialized care that improve patient-centered outcomes. For more information about ACHA, contact (888) 921-ACHA or visit www.achaheart.org.
